

# Problem faced by The Health Sector and System for Health Crisis in Sri Lanka

Type of study: Observational Study

Reporting Guidelines: STROBE

Checklist:

## A. Introduction and Background

- Title and abstract
- Background and objectives
- Study design

## B. Methods

- Participants
- Variables
- Data sources/measurement
- Bias
- Study size
- Quantitative variables
- Statistical methods

## C. Results

- Participants
- Descriptive data
- Outcome data
- Main results
- Other analyses
- Limitations

## D. Discussion

- Interpretation
- Generalizability
- Overall evidence
- Limitations
- Conclusions

#### E. Other Information

- Funding
- Protocol and registration
- Acknowledgments
- References

Additional checklist items based on the information provided:

- Description of the problem faced by the health sector and system for health crisis in Sri Lanka
- Explanation of the aim or objective of the study
- Description of the population studied
- Sample size calculation
- Description of the data collection methods used (surveys, forms, social media monitoring)
- Description of the data analysis methods used (regression analysis, time series analysis, cluster analysis)
- Explanation of the main results of the study
- Description of the limitations of the study
- Inclusion of a table of contents and list of illustrations
- Use of clear and concise language throughout the manuscript

I hope this checklist helps you ensure that your manuscript meets the necessary reporting standards for an observational study. Please let me know if you have any further questions or if you need additional assistance.
